EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

- Claim 32 has been amended as follows:

32. (Currently Amended) The gray-water reuse system as in claim 29, wherein said pressure valve is elongate and further comprises:

a first end and a second end, said first inlet port being generally positioned in a central portion of said pressure valve, said second inlet port being located generally adjacent to said second end of said pressure valve, said exit port being in said second end of said pressure valve, a stopper being slidably movable within said pressure valve, said stopper comprising a seal between said first and second inlet ports, said stopper having a biasing means thereon for biasing said stopper toward said second inlet port, said biasing means being a spring, said spring being coupled to a rod, said rod being rotatably inserted in said first end of said pressure valve, said rod being threaded;

a first pipe having a first end being fluidly coupled to said first inlet port and a second end being fluidly coupled to said gray-water outlet, said first pipe second end being positioned between said first valve and said first one-way valve;

Art Unit: 1797

a second pipe having a first end being fluidly coupled to said fresh water inlet and a second end being fluidly coupled to said second inlet port; and

a third pipe having a first end being fluidly coupled to said exit port and a second end being fluidly coupled to said gray-water outlet, said first one-way valve being between said first and third pipes, said third pipe having a second one-way valve such that fluid traveling through said third pipe travels in a first direction from said third pipe first end toward said third pipe second end.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

- For claims 18-22 and 29-33, the closest cited art—McDonald et al (U.S. 5,317,766) and Johnson, Jr. (U.S. 5,845,346)—fail to anticipate or render obvious, alone or in any proper combination, the described pressure stabilizing means that is adapted to allow the flow of fresh water in the event the solenoid fails to open the plug—within the systems of claims 18 and 29.
- For claims 12-17 and 23-28, the closest cited art—Johnson, Jr. (U.S. 5,845,346)—fails to anticipate or render obvious, alone or in any proper combination, the first valve having a first plug positioned between a middle section and a first end coupled to the pumping means and a second plug that is positioned between the middle section coupled to a grey water outlet and a second end coupled to a fresh water inlet, wherein the second plug is moved by a solenoid actuator to allow the flow of fresh water to the gray water outlet whenever a pressure sensing means within the first valve indicates the pressure of the gray water has fallen--within the systems of claims 12, 17, 23 and 28.

Art Unit: 1797

- Note that no supplemental reissue oath was required as this Examiner's amendment corrects only grammar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Terry K. Cecil whose telephone number is (571) 272-1138. The examiner can normally be reached on 8:00a-4:30p M-F..
